LET THEM

TEACH *THEMSELVES*

A STEP IN SOLVING the problem of accidents among teen agers is to persuade that age group to participate in accident prevention programs. That is the philosophy of the women's committee of the Monmouth County Safety Council, affiliated with the New Jersey Safety Council.

When the subject of accident prevention among teen agers was discussed at a recent meeting of the women's committee, it was the unanimous conclusion that too much time was spent by parents, civic leaders, and others in criticizing the conduct of teen agers. Instead, why not get them together, the committee reasoned, and let them carry on their own programs in accident prevention.

Mrs. Frank Hayes, committee chairman, suggested that a series of radio programs would be a practical project by which the idea of actual participation could be carried out. Radio station WPLK, Asbury Park, indorsed the idea. Mrs. Hayes and Peggy Curtis, representing the radio station, found school administrators in the area willing to cooperate.

Before long the teachers in the public and parochial schools of eighteen municipalities in the county had the teen agers at work writing a series of radio scripts. Students in the school of journalism at Rutgers University also assisted in the preparation of scripts. Close to one hundred teen agers appeared on the 12-week program. Assisting in the preparation of the scripts and participating in the broadcast were organizations such as the Police Athletic League of Red Bank, 4-H Clubs, YMCA's, and Boy Scout and Girl Scout groups.

"I consider this to be one of the most concentrated safety campaigns ever carried on among teen agers in New Jersey," Mrs. Hayes said.

"Its effectiveness arises from the fact that one group of teen agers had to study about safety to be able to write the scripts and another group handling the broadcasts received a broad education in accident prevention."
